Centricity* Practice Solution

Build your best practice.
Set a new standard.

Build new standards of excellence. By building new standards of efficiency.

Centricity Practice Solution

An integrated electronic medical records (EMR) and practice management (PM) system backed by quality reporting metrics that helps your practice provide higher quality care, achieve new levels of operating efficiency, and reduce operating costs. Centricity Practice Solution enables data-driven decisions at the point of care and is a certified solution for Meaningful Use.

Build your best practice.

Your goal has always been clear: run the best practice possible. So you do your best to manage different information systems. And you work to find the best technologies to help you keep up with ever-evolving regulatory requirements. It's all an important part of your work. And now, it can be a whole lot easier.

Centricity Practice Solution helps you turn daily activities into best practices – and transform the vision you have of your practice into your everyday reality. An integrated EMR and PM system developed to support the way physicians work, Centricity Practice Solution can help you build:

- Consistency by ensuring that everyone in your practice is working from a single, integrated set of data
- Efficiency with a workflow based on physicians' input to streamline processes and minimize clicks
- Insight into clinical decisions by benchmarking against a database of 20 million unique patients
- Intelligence into your finances with dashboards that identify inefficiencies and opportunities to reduce costs

Helping you qualify for Meaningful Use – at every stage.

Certified for Meaningful Use, Centricity Practice Solution has the tools and services to help you take advantage of Meaningful Use incentives – including a quality and Meaningful Use measure performance dashboard, ePrescribing, a patient portal, and secure clinical messaging. Plus, with GE Healthcare as your partner, you can depend on support and expertise at every stage of Meaningful Use.

Integrated

With one set of up-to-the-minute data, everyone can make better clinical decisions.

The fact is most EMR, practice management, and clinical systems don't communicate well with each other. But if they did, you could count on more informed clinical decisions and more efficient claims.

Centricity Practice Solution brings together patient registration, claims, billing, and patient medical records into a single, powerful system – so patient data flows seamlessly through your practice. Everyone has access to the same set of current data for faster, more informed decisions.

Because you've invested a lot in your technology, Centricity Practice Solution fosters connectivity with other vendor solutions using standards-based interoperability. While some vendors' solutions use a third-party EDI, Centricity EDI is integrated into the system, so you can count on clearer, faster results from insurance companies. With Centricity Practice Solution, your practice will be fully ready for Meaningful Use attestation and HIPAA 5010 requirements.

Designed to work the way you do.

Our new interface gives you a more complete picture of your patients with current data for more informed decisions. You'll also have a clear view of your finances with advanced financial reports and dashboards that allow you to monitor every aspect of your revenue cycle.

“Centricity Practice Solution makes a meaningful difference in the quality of care we deliver to patients. Partnering with vendors ensures success, and GE Healthcare is a great partner. We even achieved Meaningful Use attestation the first day possible.”

*– Barbara Watkins, Administrator
Heart & Vascular Center of Arizona*

Intuitive

**Efficiency starts with your workflow.
So we started by asking you.**

When evaluating EMR, one of the most important questions to ask is will physicians actually use it. No matter how powerful a system may be, physicians won't use it if it doesn't match how they work every day.

That's why we asked physicians for extensive feedback and input on the Centricity Practice Solution user interface. We reduced the number of clicks needed at every step – from patient registration through clinical evaluation. The new interface for scheduling, filing claims, and billing is so intuitive that your people will be up and running quickly with minimal disruption to your practice.

Informed

It's not just more information. It's more up-to-date, intelligent, and relevant information.

Of course, every practice strives to improve the quality of care. For every doctor, that means treating individuals, not just seeing patients. And that means having access to information that enables better clinical decisions.

Centricity Practice Solution is the only EMR and PM system backed by the Medical Quality Improvement Consortium (MQIC), a rapidly growing quality reporting and research database with de-identified clinical data from approximately 20 million unique patients. This database let's you make data-driven decisions based on completely current information and benchmark your practice's performance against others to see how the care you deliver meets common standards. With such easy access to clinical information, you can better manage specific conditions and populations.

You can also make more informed business decisions using financial reports and dashboards that make it easy to monitor your entire revenue cycle – from accounts receivable to insurance claims and billing. Customizable layouts populated with live data give you a quick, easy look into the health of your practice. So you can identify inefficiencies and opportunities to reduce costs and increase productivity every day.

20 million unique patients to help you make better decisions

With Centricity Practice Solution, you can take advantage of the growing MQIC database and its quality reporting services. One of the largest databases of patients, MQIC allows you to benchmark your de-identified data against other practices.

Build your best practice

Building your best practice is easier when you've got a solution partner with the best experience.

With years of experience in healthcare and technology, GE Healthcare is a strategic partner you can count on to help your practice meet Meaningful Use, HIPAA 5010, ICD-10, Accountable Care, and any other new challenges the future may hold.

Our internal team has the expertise to help your practice identify and prepare for industry pressures. We work collaboratively and will listen to you to understand the needs of your practice to make sure that all product enhancements can help you get the best return on your investment – and build your best practice.

About GE Healthcare

GE Healthcare provides transformational medical technologies and services that are shaping a new age of patient care. Our broad expertise in medical imaging and information technologies, medical diagnostics, patient monitoring systems, drug discovery, biopharmaceutical manufacturing technologies, performance improvement and performance solutions services help our customers to deliver better care to more people around the world at a lower cost.
